YUDI KARMA

SENIOR FULL-STACK & MOBILE SOLUTIONS ARCHITECT

Email: yudikarmateknik@gmail.com
Location: South Jakarta, Indonesia
LinkedIn: linkedin.com/in/yudikarma
GitHub: github.com/yudikarma | **Portfolio:** yudikarma.vercel.app

PROFESSIONAL SUMMARY

Versatile Senior Full-Stack & Mobile Engineer with over 8 years of software architecture experience building scalable web platforms, native mobile applications, cloud backend infrastructure, and AI API integrations. Proven background consulting tier-1 financial institutions (BCA, BNI, Bank BTN, CIMB Niaga, Panin Bank, Bank BJB) on enterprise security and real-time communication systems. Proficient across React 19, TypeScript, Tailwind CSS, Node.js, Laravel 12, Kotlin/Android, Flutter, Supabase, Firebase, WebSockets, WebRTC, and Google Gemini AI.

TECHNICAL COMPETENCIES

Web Frontend & UI:	React 19, React 18, TypeScript, JavaScript (ES6+), Next.js, Tailwind CSS, Framer Motion, HTML5/CSS3, State Management, Recharts / D3.js
Backend & Databases:	Node.js, Express, Laravel 12, RESTful APIs, WebSockets, PostgreSQL, Supabase BaaS, Firebase, Room DB, SQLite, LocalStorage Caching
Mobile Engineering:	Kotlin, Java, Jetpack Compose, Android SDK, Flutter, Dart, React Native, CameraX ML Kit, Biometrics, Offline-first Architecture
Cloud & Infrastructure:	Google Cloud Platform (GCP), Google Gemini AI API, Dynatrace APM, OneSpan Security, DexGuard RASP, Git, Docker, CI/CD, System Design

PROFESSIONAL EXPERIENCE

Senior Enterprise Solutions & Mobile Architect

Jun 2021 — Present

PT. Phintraco Technology — Enterprise Technical Consulting

- **KeyBCA Soft Token (Client: Bank Central Asia):** Architected and maintained native banking soft token authentication application with custom cryptographic signing algorithms and mTLS microservice integrations.
- **Halo BCA & Wondr BNI WebRTC (Clients: BCA & BNI):** Spearheaded WebRTC and Avaya Elite SDK technical integrations, engineering custom Kotlin & Jetpack Compose UI reference applications for real-time video/voice signaling.
- **Tetherfi Omnichannel Chat (Clients: Bank BTN & CIMB Niaga):** Integrated Tetherfi customer engagement SDKs for bale by BTN and OCTO Mobile (CIMB Niaga) to power secure digital chat channels and agent routing inside mobile apps.
- **Banking Security Consulting (Clients: Bank BJB & Panin Bank):** Consulted banking client engineering teams on BJB Digi and Panin Mobile for OneSpan Security Suite and DexGuard app shielding (RASP, dynamic obfuscation, mTLS).
- **Dynatrace APM Telemetry:** Configured Dynatrace Real User Monitoring (RUM) and performance dashboards to track end-to-end API transaction latency and server response queries.

Full-Stack Mobile & Web Engineer

Nov 2019 — Jun 2021

PT. Derap Kreasi Persada — Full-Stack Systems Engineering

- **Santriqu Fintech (Client: Educational Institutions):** Architected school fintech application using MVVM and Clean Architecture, integrating multiple local payment gateways for tuition processing and real-time PPOB transactions.
- **Yipy Operations (Client: Centratama Group Staff):** Developed Yipy operations utility using Flutter & Dart, implementing real-time complaint ticket tracking over WebSockets and Google Maps logistics integration.
- **Warung Babe P2P (Client: Giropos / PT Pos Indonesia Merchant Network):** Built Warung Babe P2P gold trading native client, optimizing reactive state updates to synchronize real-time market feeds with Giropos API billing.

Senior Full-Stack & Mobile Developer (Freelance / Solo Maker)

2020 — Present

Independent Product Engineering & Consulting

- **FinTrack (AI Budget Manager):** Built full-stack web application using React 19, Node.js, Firebase, and Google Gemini AI API for automated receipt OCR parsing.
- **Wedly Finance (SaaS Platform):** Designed dual-role React 18 & TypeScript wedding management web platform featuring interactive timeline builders, vendor comparison analytics, and Framer Motion UI.
- **Warkop Modern POS:** Engineered full-stack Laravel 12 multi-tenant coffee shop ordering platform featuring role-based access control and encrypted QR table-ordering.
- **LogamHub SaaS (Client: Irvan Gold Roger / Private Client):** Built native Kotlin Android app for gold price tracking & inventory auditing using Room DB, WorkManager sync, CameraX ML Kit scanning, and Supabase BaaS.

Android & Utilities Developer

Nov 2018 — Nov 2019

PT. 107, BSD — Native Developer

- **Snow Remove Camera Utility (Client: Industrial Snow Removal Contractor, Japan):** Developed specialized industrial camera application for snow removal operations in Japan using low-level Camera 1 & Camera 2 APIs with custom EXIF location metadata verification.
- **Zonapets Social Platform (Client: Hyrax Pet Network):** Built Zonapets social networking client featuring media compression pipelines and nested RecyclerView feed caching.

DETAILED PROJECTS & TECHNICAL SPECIFICATIONS

FinTrack — AI-Powered Personal Finance Platform

Product Type: Open-Source AI Web App | Tech: React 19, Node.js, Firebase, Google Gemini API, Tailwind CSS

Full-stack web application featuring Google Gemini AI automated receipt parsing, real-time expenditure charts, and secure Firebase backend architecture.

Wedly Finance — Editorial Wedding Management SaaS

Product Type: Independent Web SaaS | Tech: React 18, TypeScript, Tailwind CSS, Framer Motion

Dual-role web architecture supporting administrative planning analytics and guest portals. Built zero-dependency vendor analytics matrix using React state math and editorial timeline tools.

Warkop Modern POS — Multi-Tenant Coffee Shop POS

Product Type: Enterprise Multi-Tenant POS | Tech: Laravel 12, PHP, PostgreSQL, Blade, QR Code Engine

Full-stack Laravel 12 multi-tenant coffee shop ordering platform featuring role-based access controls, encrypted QR table-ordering, and real-time sales reporting dashboards.

LogamHub (formerly Irvan Gold Roger) — Gold Inventory & Trading SaaS

Client App: LogamHub | Client: Private Client (Irvan Gold Roger) | Tech: Kotlin, Jetpack Compose, Supabase, Node.js

Architected an offline-first Android application in Kotlin using Jetpack Compose (Material 3), MVVM, and Dagger Hilt. Implemented Room local caching, background sync using WorkManager, Supabase SDK (Auth, Realtime, Database), and custom Node.js backend.

PROFESSIONAL CERTIFICATIONS

- **Google Cloud Certified Associate Cloud Engineer** — Google Cloud (May 2025 — May 2028)
- **Google Cloud Certified Cloud Digital Leader** — Google Cloud (Mar 2025 — Mar 2028)
- **Dynatrace Certified Associate** — Dynatrace (Mar 2026 — Mar 2028)
- **Dynatrace Certified Essentials** — Dynatrace (Mar 2026 — Mar 2028)
- **Avaya Infinity™ Design and Workflows** — Avaya (Sep 2025 — Lifetime)
- **Google Developer Kejar (Android Developer)** — Google x Dicoding (2019)
- **Technical Support Certification** — Balai Pelatihan Kerja (2018)

EDUCATION

Politeknik Aceh — Bachelor of Applied Science in Informatic Engineering (GPA: 3.56/4.00) **2014 — 2018**
